

Techniques of Medieval Armour Reproduction: The 14th Century, Brian R. Price, Paladin Press, 2000, 1581605366, 9781581605365, 508 pages. Few historical icons can match the evocative power of the medieval suit of armour, and this epic new book is a complete course in the tools and techniques of the modern armourer's art. Through more than 1,000 detailed photos and clear instruction, Brian Price presents a working handbook for aspiring and active armourers who want to develop their skills in the production of medieval armour in the style of the 14th century. The book is divided into four sections: a sweeping history of armour and its production from its medieval roots to its modern revival; a practical introduction to all the tools and supplies necessary to equip a modern workshop; a thorough review of key techniques; and a series of actual courses in constructing armoured defenses for the head, body, arm, hand and leg. Taking the reader through the construction of an authentic medieval harness from conception to completion, Techniques of Medieval Armour Reproduction is a vital addition to the libraries of serious craftsmen, historians, collectors and researchers..
